# Request for Information

for

## Interactive Monitors

Dated: 05-30-2024

## Introduction:

Richland-Bean Blossom Community School Corporation (RBBCSC) is a K-12 public school corporation located in Ellettsville, Indiana, in the Northwestern part of Monroe County, Indiana, in the United States. RBBCSC serves Ellettsville, Stinesville, Bean-Blossom Township, and Richland Township.

## Objective:

Richland-Bean Blossom Community School Corporation is seeking information on Interactive Monitors for classrooms. We would like to see the latest and greatest products designed for K-12. That would include any peripherals to aid in classroom instruction.

## Current Classroom Environment:

Currently, most instructional classrooms contain overhead projectors and screens in grades 3 - 12. In K-2, instructional classrooms contain an overhead projector and Smart Boards connected via a VGA cable and USB to a dedicated workstation. All projectors have adequate built-in speakers.

## Project Time Line:

Currently, we do not have a timeline for purchasing interactive monitors. The information provided will help us prepare and issue a Request for Bid (RFB) at a later date.

## Demonstration:

Please contact Rick Routon, [rrouton@rbbschools.net](mailto:rrouton@rbbschools.net), using the subject line Interactive "Monitor Demonstration" to schedule a demonstration of your products. Your demonstration will be presented to a group of teachers and administrators.
